ANALYTIC SUBJECT INDEX

Adsorbed layers
– New microscopic approach in the theory of— - Gavrilenko **150A** (1988) 137
Anderson–Ising models
– New microscopic approach in the theory of adsorbed layers - Gavrilenko **150A** (1988) 137
Angular momentum alignment
– Optical determination of the *J*-dependence of—in a heat conducting gas - van den Oord et al. **150A** (1988) 77
Antibunching (see *N-level single model system*) **150A** (1988) 280

Bethe approximation (see *Ising spin glass*) **150A** (1988) 614

Chaos, one-dimensional
– Pearson-walk visualization of the characteristic function of the invariant measure for 1-d chaos - Nagai et al. **150A** (1988) 40
Charged particle system
– Analytical solutions of the Rayleigh flow problem for a rarefied gas of a nonhomogeneous system of charged particles - Khater and El-Sharif **150A** (1988) 592
Chemisorption, electronic
– New microscopic approach in the theory of adsorbed layers - Gavrilenko **150A** (1988) 137
Close-packed structure (see *Local structure of condensed matter*) **150A** (1988) 383
Cluster growth
– A stochastic approach to nucleation in finite systems: theory and computer simulations - Schweitzer et al. **150A** (1988) 261
Coarsening (see *Droplet size distribution*) **150A** (1988) 463
Coherent-anomaly method (see *Self-avoiding walk*) **150A** (1988) 310
Collision integrals (see *Semiconductor*) **150A** (1988) 439
Colloid suspension
– Rotational diffusion of a tracer colloid particle. I. Short time orientational correlations - Jones **150A** (1988) 339
Condensed matter (see *Local structure of condensed matter*) **150A** (1988) 371
Condensed matter (see *Local structure of condensed matter*) **150A** (1988) 383
Critical exponents (see *Defects in crystals*) **150A** (1988) 576
Critical exponents (see *Ising models*) **150A** (1988) 293
Critical phenomena (see *Xenon plasma*) **150A** (1988) 159
Crystal free energy (see *Defect crystal*) **150A** (1988) 659
Crystal lattice relaxation
– A statistical study of the defect— - Narkevich **150A** (1988) 659
Cubic anisotropic crystals
– Crossover behavior of systems associated with extended-defect *N*-component systems in— - Yamazaki et al. **150A** (1988) 576

Decaying phenomena
– —in high density plasmas - Kim **150A** (1988) 512

Defect crystal
– A statistical study of the—lattice relaxation - Narkevich **150A** (1988) 659
Defects in crystals
– Crossover behavior of systems associated with extended-defect N-component systems in cubic anisotropic crystals - Yamazaki et al. **150A** (1988) 576
Density expansion (see *Momentum autocorrelation function*) **150A** (1988) 199
Density matrix (see *Phase space probability*) **150A** (1988) 541
Director field (see *Nematic crystal*) **150A** (1988) 299
Droplet size distribution
– Statistical theory of Ostwald ripening with elastic field interaction - Kawasaki and Enomoto **150A** (1988) 463

Elastic constants (see *Uniaxial nematics*) **150A** (1988) 1
Elastic field interaction (see *Ostwald ripening*) **150A** (1988) 463
Electron bound states (see *Plasmas, high temperature*) **150A** (1988) 357
Electron–hole kinetics (see *Semiconductor*) **150A** (1988) 419
Electron–hole kinetics (see *Semiconductor*) **150A** (1988) 439
Extended-defect systems (see *Defects in crystals*) **150A** (1988) 576

Ferromagnetic phase (see *Spin glass*) **150A** (1988) 499
Fluctuations, population (see *Plasmas, high temperature*) **150A** (1988) 357
Fluctuations (see *Local structure of condensed matter*) **150A** (1988) 371
Fluorescence, laser-induced (see *Angular momentum alignment*) **150A** (1988) 77
Fractals
– Exact renormalization group treatment of the piecewise directed random walks on—- Elezović-Hadžić et al. **150A** (1988) 402
Frustration
– Ground states of a frustrated Ising model with one-, two- and three-body interactions - Lipkin **150A** (1988) 18

Gaussian wave-packet representation
– Quantum mechanics in the Gaussian wave-packet phase space representation III: From phase space probability functions to wave-functions - Mizrahi **150A** (1988) 541
Green's function, nonequilibrium (see *Semiconductor*) **150A** (1988) 419
Ground state
– —s of a frustrated Ising model with one-, two- and three-body interactions - Lipkin **150A** (1988) 18

Handel's theory
– Further comments on Handel's theories of quantum $1/f$ noise - van Vliet **150A** (1988) 244
Heat conducting gas
– Optical determination of the J-dependence of angular momentum alignment in a—- van den Oord et al. **150A** (1988) 77

Inhomogeneous systems, spatially
– Spatially inhomogeneous thermo field dynamics - Nakamura et al. **150A** (1988) 118
Invariant measure (see *Pearson-walk*) **150A** (1988) 40
Iodine gas (see *Heat conducting gas*) **150A** (1988) 77
Ionized gas, weakly (see *Recombination, ionic*) **150A** (1988) 627
Ionized gas, weakly (see *Recombination, ionic*) **150A** (1988) 642
Ionized plasma, weakly–strongly (see *Xenon plasma*) **150A** (1988) 159
Ion–neutral collisions (see *Recombination, ionic*) **150A** (1988) 627

Ion–neutral collisions (see *Recombination, ionic*) **150A** (1988) 642
Ising model, frustrated
– Ground states of a frustrated Ising model with one-, two- and three-body interactions - Lipkin **150A** (1988) 18
Ising model, two-dimensional
– Two-dimensional Ising model with annealed random fields - Horiguchi and Gonçalves **150A** (1988) 672
Ising model with spin 1/2, 1
– An analytic approach to Ising model with spin 1/2 and spin 1 - Šamaj **150A** (1988) 324
Ising models
– —with two- and three-spin interactions - Urumov **150A** (1988) 293
Ising spin glass
– —in a field at zero temperature in the Bethe approximation - De Oliveira **150A** (1988) 614
Ising–Heisenberg model
– Order–order and order–disorder transitions in the quantum spin-1—s - Buzano **150A** (1988) 54

Jaynes–Cummings model
– A generalized *N*-level single-mode— - Kochetov **150A** (1988) 280

Kagan polarization (see *Angular momentum alignment*) **150A** (1988) 77
Kinetic equation (see *Inhomogeneous systems, spatially*) **150A** (1988) 118

Laser excitation, resonant
– Resonant laser excitation and electron–hole kinetics of a semiconductor. II. Nonlinear particle transport and field propagation - Henneberger and Kühn **150A** (1988) 439
Laser excitation, resonant (see *Semiconductor*) **150A** (1988) 419
Laser master equation
– A derivation of the—in terms of thermo field dynamics - Tominaga et al. **150A** (1988) 97
Liouvillian Green's function (see *Decaying phenomena*) **150A** (1988) 512
Lippmann–Schwinger equation
– On the—in Liouville space. *Ĩ1* Subdynamics - Veguillas and Muga **150A** (1988) 172
Liquid crystal
– On the tensor vs. the vector character of the director field in a nematic— - van der Zwan **150A** (1988) 299
Local structure of condensed matter
– A statistical description of the—. I. General theory - Mitus and Patashinskii **150A** (1988) 371
– A statistical description of the—. II. Close-packed structures - Mitus and Patashinskii **150A** (1988) 383
Long time tails (see *Momentum autocorrelation function*) **150A** (1988) 199

Maps, one-dimensional (see *Pearson-walk*) **150A** (1988) 40
Markov mean-field model (see *N-atom system*) **150A** (1988) 455
Maxwellian distribution (see *Rayleigh flow problem*) **150A** (1988) 592
Melt–melt transition (see *Local structure of condensed matter*) **150A** (1988) 383
Microemulsions
– Ground states of a frustrated Ising model with one-, two- and three-body interactions - Lipkin **150A** (1988) 18
Molecular statistical theory (see *Uniaxial nematics*) **150A** (1988) 1
Momentum autocorrelation function
– A new microscopic evaluation method for correlation functions: long time tails - Loss and Schoeller **150A** (1988) 199

Multicomponent systems (see *Potts models, D-state (D vector)*) **150A** (1988) 555
Multicomponent systems (see *Spin model, D-dimensional*) **150A** (1988) 567

N-atom system
– Limited thermalizaion for the Markov mean field model of *N* atoms in thermal field - Alicki **150A** (1988) 455
N-level single model system
– A generalized *N*-level single-mode Jaynes–Cummings model - Kochetov **150A** (1988) 280
Nematic crystal
– On the tensor vs. the vector character of the director field in a nematic liquid crystal - van der Zwan **150A** (1988) 299
Nematics
– The molecular-statistical calculation of the elastic constants of uniaxial— - Govers and Vertogen **150A** (1988) 1
Nucleation
– A stochastic approach to—in finite systems: theory and computer simulations - Schweitzer et al. **150A** (1988) 261

1/f noise, quantum
– Further comments on Handel's theories of quantum 1/*f* noise - van Vliet **150A** (1988) 244

Order-disorder transitions
– Order–order and order–disorder transitions in the quantum spin-1 Ising–Heisenberg models - Buzano **150A** (1988) 54
Order parameters (see *Local structure of condensed matter*) **150A** (1988) 383
Order–order transitions (see *Spin-1 quantum model*) **150A** (1988) 54
Orientational correlations
– Rotational diffusion of a tracer colloid particle. I. Short time— - Jones **150A** (1988) 339
Ostwald ripening
– A stochastic approach to nucleation in finite systems: theory and computer simulations - Schweitzer et al. **150A** (1988) 261
– Statistical theory of—with elastic field interaction - Kawasaki and Enomoto **150A** (1988) 463

Pearson-walk
– —visualization of the characteristic function of the invariant measure for 1-d chaos - Nagai et al. **150A** (1988) 40
Phase diagrams (see *Potts models, D-state (D vector)*) **150A** (1988) 555
Phase space probability
– Quantum mechanics in the Gaussian wave-packet phase space representation III: From—functions to wave-functions - Mizrahi **150A** (1988) 541
Phase transitions (see *Spin model, D-dimensional*) **150A** (1988) 567
Ĩ Ĩ subdynamics
– On the Lippmann–Schwinger equation in Liouville space. *Ĩ Ĩ* Subdynamics - Veguillas and Muga **150A** (1988) 172
Plasmas, high density
– Decaying phenomena in high density plasmas - Kim **150A** (1988) 512
Plasma phase transtion (see *Xenon plasma*) **150A** (1988) 159
Plasmas, high temperature
– Correlated fluctuations of electron populations in high temperature plasmas - Perrot **150A** (1988) 357
Potts models, D-state (D vector)
– On statistical thermodynamics of multicomponent systems I - Otwinowski **150A** (1988) 555

Random fields, annealed (see *Ising model, two-dimensional*) **150A** (1988) 672
Random-site model
– Reentrant transitions in the van Hemmen model of a spin glass - Jędrzejewski et al. **150A** (1988) 499
Random walk (see *Pearson-walk*) **150A** (1988) 40
Random walks
– Coherent-anomaly method in self-avoiding walk problems - Hu and Suzuki **150A** (1988) 310
Random walks, piecewise directed
– Exact renormalization group treatment of the piecewise directed random walks on fractals - Elezović-Hadžić et al. **150A** (1988) 402
Rayleigh flow problem
– Analytical solutions of the—for a rarefied gas of a nonhomogeneous system of charged particles - Khater and El-Sharif **150A** (1988) 592
Reaction kinetics (see *Recombination, ionic*) **150A** (1988) 627
Recombination, ionic
– Ionic recombination in a weakly ionized gas. I. A stochastic approach to the recombination rate problem - Naumann **150A** (1988) 627
– Ionic recombination in a weakly ionized gas. II. A formal expansion for the recombination constant and its relation to transitional approaches - Naumann **150A** (1988) 642
Recombination constant (see *Recombination, ionic*) **150A** (1988) 642
Reentrant transition (see *Ising model, two-dimensional*) **150A** (1988) 672
Reentrant transition (see *Van Hemmen model*) **150A** (1988) 499
Renormalization group (see *Defects in crystals*) **150A** (1988) 576
Renormalization group treatment (see *Random walks, piecewise directed*) **150A** (1988) 402
Residual entropy (see *Ising spin glass*) **150A** (1988) 614
Rotational diffusion
– —of a tracer colloid particle. I. Short time orientational correlations - Jones **150A** (1988) 339

Scattering theory (see *Lippmann–Schwinger equation*) **150A** (1988) 172
Self-avoiding walk
– Coherent-anomaly method in—problems - Hu and Suzuki **150A** (1988) 310
Self-energy (see *Decaying phenomena*) **150A** (1988) 512
Semiconductor
– Resonant laser excitation and electron–hole kinetics of a—. I. Nonequilibrium Green's function treatment and fundamental equations - Henneberger **150A** (1988) 419
– Resonant laser excitation and electron–hole kinetics of a—. II. Nonlinear particle transport and field propagation - Henneberger and Kühn **150A** (1988) 439
Sierpinski gasket (see *Random walks, piecewise directed*) **150A** (1988) 402
Spin glass
– Reentrant transitions in the van Hemmen model of a— - Jędrzejewski et al. **150A** (1988) 499
Spin glass, Ising
– Ising spin glass in a field at zero temperature in the Bethe approximation - De Oliveira **150A** (1988) 614
Spin model, D-dimensional
– On statistical thermodynamics of multicomponent systems II - Otwinowski **150A** (1988) 567
Spin-1 quantum model
– Order–order and order–disorder transitions in the quantum spin-1 Ising–Heisenberg models - Buzano **150A** (1988) 54
Squeezing (see *N-level single model system*) **150A** (1988) 280
Structural invariant (see *Local structure of condensed matter*) **150A** (1988) 371
Superoperator formalism (see *Momentum autocorrelation function*) **150A** (1988) 199
Superradiance
– Limited thermalizaion for the Markov mean field model of N atoms in thermal field - Alicki **150A** (1988) 455

Tensor vs. vector character (see *Nematic crystal*) **150A** (1988) 299
Thermo field dynamics
– A derivation of the laser master equation in terms of— - Tominaga et al. **150A** (1988) 97
– Spatially inhomogeneous— - Nakamura et al. **150A** (1988) 118
Three-spin Ising model
– Ising models with two- and three-spin interactions - Urumov **150A** (1988) 293
Tracer diffusion
– Rotational diffusion of a tracer colloid particle. I. Short time orientational correlations - Jones **150A** (1988) 339
Transition temperatures (see *Ising model with spin 1/2, 1*) **150A** (1988) 324
Two and three-body interactions
– Ground states of a frustrated Ising model with one-, two- and three-body interactions - Lipkin **150A** (1988) 18
Two-spin Ising model
– Ising models with two- and three-spin interactions - Urumov **150A** (1988) 293

Uniaxial nematics
– The molecular-statistical calculation of the elastic constants of— - Govers and Vertogen **150A** (1988) 1

Van Hemmen model
– Reentrant transitions in the—of a spin glass - Jędrzejewski et al. **150A** (1988) 499

Xenon plasma
– Thermodynamic properties and plasma phase transition of xenon at high pressure and high temperature - Ebeling et al. **150A** (1988) 159
